skin's appearance
faster, with less pain,
and no downtime.*

Frequently Asked Questions

Am I a good candidate for ClearLift ?

If your skin shows signs of imperfection or looks older than you would like, you are a good candidate for ClearLift treatments. The best candidates have mild to moderate sun damage, are in good health and take care of their skin.

Does ClearLift work on my skin type?

ClearLift is a non-ablative approach to correcting skin's imperfections and can be performed on all skin types.

How long does it take?

Treatment times will vary on many factors but it can take as little as 20 minutes. If your condition is advanced, it may take longer.

Is it Safe?

ClearLift treatments are being performed all over the world and continue to be reliable and effective. At the time of this publication, no serious injuries have been reported in connection with this treatment. However, some skin conditions and health issues can interfere with any treatment of this nature, so consult with your provider to be sure.

How much does it cost?

The cost for ClearLift or any laser treatment varies depending on your skin condition and the extent of the treatment.

Arrange a Personal Consultation Today!

Choosing the right laser skin treatments is an important and sometimes overwhelming experience. Always make a list of questions prior to any consultation to be sure the treatment is right for you.

The Science Behind ClearLift™

Non-Ablative Skin Resurfacing with Dramatic Results

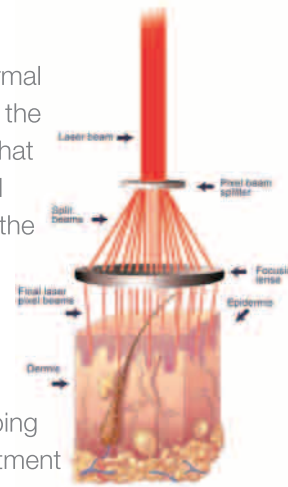

What is ClearLift?

ClearLift, is a virtually painless, non-ablative approach to correcting skin's imperfections. Using 1064nm Q-Switched laser technology, patients are enjoying fast, comfortable treatments with visible results and no downtime.

How it works?

Alma Laser's ClearLift delivers a controlled dermal wound without harming the overlying epidermis so that all stages of healing and skin repair occur under the intact epidermis.

Because Alma Laser's ClearLift heats deep beneath the skin (up to 3mm in depth) no numbing is required prior to treatment and all skin healing happens without damaging the outer layer of skin.

What should you Expect?

- Comfortable Treatment
- No downtime
- Fast - Called the "Lunch Break Facelift"
- Visible improvement in skin appearance

Dramatic Results

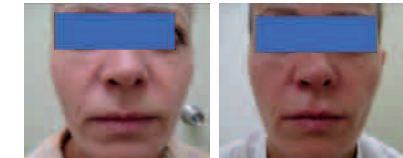

ClearLift is used for the improvement of fine lines, wrinkles, the appearance of small veins and redness caused by vascularity. ClearLift is also gentle enough to treat areas that are typically too sensitive to treat with traditional ablative lasers, such as the delicate skin around the eyes, neck, mouth and chest.
