Turn back the clock on fine lines and wrinkles,
through an advanced medical aesthetic protocol
called *Laser360* from Alma Lasers.

The Laser360 treatment reveals brighter, younger
and healthier-looking skin, from the inside out. It
treats fine lines and discolorations from deep in the
skin to give you a lasting new, revitalized look.

Your provider offers Laser360, and has
provided this brochure for you to answer some
common questions and let you know what might
be possible.

*Laser360 gives you a more youthful look,
without surgery:*

Complete skin rejuvenation

Achieve complete skin rejuvenation using 3 technologies in just 60 days with Laser360.

If you're not ready for a full facelift, but you're no longer satisfied with the results of topical creams and lotions, Laser360 is for you.

Laser360 treatments will improve your skin's color, texture and tone. Consult with your provider about optional additional treatments for surgical scars, acne pitting or sundamage on your chest or hands.

Your provider will combine the three different technologies into a treatment plan that is customized exclusively for you.

Skin resurfacing

Laser360 stimulates new collagen to grow, which improves your skin's texture and tone to fight fine lines and wrinkles. It works by creating thousands of microscopic perforations, but the skin around each of these perforations remains intact. This allows the skin's top layer to heal from the edge of these tiny holes very rapidly.

Skin tightening

Laser360 also firms up any loose skin around your eyes, nose and jaw so you regain a more youthful, contoured appearance. The skin tightening treatment uses near-infrared light to create deep heating in your body, which facilitates the skin's remodeling.

Skin color

And finally, Laser360 eliminates superficial pigmented and vascular marks, evens out your skin color and reduces tiny broken blood vessels. Combining all three technologies will leave you with fresher, smoother, younger looking skin.

Safe and comfortable

Laser360 treatments are safe, comfortable and effective without injections, surgery or down time. You can expect your skin to be somewhat flushed after the treatment—similar to a mild sunburn. Any mild symptoms should subside in about 48 hours.
